Algorithmic Trading Survey: Long-only and Hedge Funds

The TRADE has been collecting market intelligence and client perception data on algorithmic trading for the past 15 years. Buy-side traders are asked to rate their algo provider(s) across 15 aspects of service, including key areas such as execution consistency, increased trader productivity and access to dark or alternative liquidity. The data collection period runs from December to February, the published results are then broken down into long-only and hedge fund responses and published in the Q1 and Q2 editions of the magazine respectively.

Execution Management Systems Survey

The TRADE has been carrying out its industry-leading survey into execution management systems over the past 10 years. The survey looks at market trends in the EMS space as well as client perception of vendors, rating their EMS offering across 13 functional criteria, including keys aspects of service such as reliability and availability, post-implementation client service and FIX capabilities. Survey data is collected throughout June through to August, with the results being published in the Q3 edition of the magazine.

Marketing opportunities:

- Advertising within the published results (ads purchased in advance can include digital accreditations)
- Digital accreditations available to outperformers across various categories
- Survey reprints, highlighting your outperformance, including your advert and digital accreditations
- Video interview discussing the survey results, outperformance and your current offerings around electronic trading
- Print/digital article discussing outperformance and your current offerings around electronic trading
- More granular data available via research reports and consultations

Top performers in this year’s surveys will be recognised at The TRADE’s annual Leaders in Trading awards, taking place at The Savoy in London on 3rd November 2022.
